

NOTICE TO BIDDERS

BID NO. 25-006

FOR

Design Services for Camera System at City Locations

INFORMATIONAL ADDENDUM NO. 1

DATED ISSUED: August 27, 2025

- 1. To confirm, this RFP is SOLELY for bidding on design plans for the city and not fully implementing the system?**
Correct, this is only to deliver design plans.
- 2. Should a company (such as EPIC iO) choose to bid in the Design Services RFP, would that make EPIC iO in-eligible to win the future RFP of the actual implementation of said design? Assuming that there is a 2nd RFP for the implementation of said Camera System**
This project is not utilizing a design-build format, therefore the selected professional for this RFP will generate a conflict of interest which will make them in-eligible to bid for the construction.
- 3. The asks around pricing are a bit misleading; are you asking for pricing around what it would cost to perform said design or (per Scope of Service Section 4) are you asking for a full-blown bid that includes cost estimation, installation, maintenance & upkeep at all ~40ish locations?**
This is accurate, an engineer's estimate of what the scope of the design would cost to procure install and maintain.
